

Fellow [7]

## Title

PhD position | MSCA Doctoral Network | Innovative trustworthy tools for increasing society's political participation

## About the Project

### About Data2Action

*Data2Action* is the Marie Skłodowska-Curie European Doctoral Training Network programme uniting social innovation with data science & AI for common good. Data2Action exists to make emerging technology work harder for humanity, enabling us to co-create a healthier, fairer and more sustainable world for all.

**Data2Action aims to train the next generation of leaders in data science, AI and social innovation, through solid research training, mentoring, networking and collaboration with industry and third sector.**

Data2Action is an ambitious new research and development project that will:

- Show social pioneers how to harness data science and AI for common good and conversely.
- Shape the future of technology development to serve social innovation and the common good.

The Data2Action project is situated at the intersection between social innovation, digital technology development and “tech/data/AI for good”.

Data2Action will bring together top researchers and experts in data science, AI, and social innovation to collaborate on five pivotal outcomes that will turn possibilities into positive impact.

#### **#1 Co-creating a research roadmap**

An evidence-based framework of best practices for applying data science and AI to drive social innovation more efficiently and rapidly.

#### **#2 Developing and testing through living labs**

Demonstrator projects showcasing the benefits of data-driven social innovations addressing **climate change, social justice, democracy, health, and ageing**.

#### **#3 Establishing a Data/AI-for-good ‘academy’**

Open-source training and tools to build capacity in social innovators, entrepreneurs and grassroots changemakers, so they can harness data science and artificial intelligence effectively, responsibly and equitably.

#### **#4 Carving out career pathways for pioneers**

A blueprint for well-paid roles with prospects in purposeful data science and AI.

#### **#5 Guiding better informed social leadership**

Practical advice, support and advocacy to encourage policymakers, funders, and government organisations to ethically embed data science and AI for common good.

*Data2Action is a MSCA Doctoral Network funded by Horizon Europe [grant number 101169037] and UK Research and Innovation (UKRI) under the UK government's Horizon Europe funding Guarantee [grant number EP/Z536581/1]*

### **Doctoral Candidate Research Project**

The main objective of the research project of the doctoral candidate is to develop AI-driven tools designed to support political participation and democratic engagement through enhanced transparency and accessibility of political information. The goal is to use data such as parliamentary sessions, voting records, and legislative documents to answer users' questions about members of parliament and their parties. These include straightforward factual responses (e.g., voting positions of members of parliament on legislation on specific topic) and more complex analytical responses (e.g., summaries of parties' arguments and positions).

To achieve this, the fellow will:

- 1) Identify key questions citizens and organizations frequently have about parliamentary actions and legislative processes. This will be done in close collaboration with a non-governmental organisation [Danes je nov dan](#) (DJND) and other partners of the consortium.
- 2) Use existing data extracted from transcripts of the Slovenian parliamentary sessions to train and evaluate AI models (e.g., embeddings, transformers) that can automatically generate responses to user queries.
- 3) Engage stakeholders through interviews, informal debates, and focus groups to ensure the AI tools developed are trustworthy, understandable, and aligned with users' needs and expectations. This will also include implementing and testing techniques for AI explainability and bias reduction using tools such as IBM's AIF360 library, ensuring transparency in how information is produced and presented.

4) Develop practical guidelines and methodological recommendations for building AI systems aimed at enhancing political participation in a trusted, socially responsible manner.

Additionally, the doctoral candidate will complete two secondments at partner organizations: at DJND to learn about their tool, Parlameter, the data they have collected, and their possible use, and at [Università della Svizzera italiana](#) (USI) to deepen expertise on explainability and trustworthy AI.

The Doctoral Candidate will be expected to:

- Report on findings by publishing scientific articles, resulting in a PhD dissertation;
- Present findings at (inter)national meetings/conferences;
- Contribute to the wider work of the Data2Action project
- Contribute to educational activities of the department and within the consortium.

## **Requirements**

### ***Essential:***

- Eligible applicants must possess or be finalising a Master's degree or an equivalent degree in a relevant discipline for Data2Action, especially computer science, artificial intelligence, ICT engineering, digital humanities, computational social science, quantitative (political) science.
- Excellent English language proficiency
- Competencies: Open-minded, self-aware, collaborative, critical thinker, team player, strong communicator.
- High interest in the topics of social innovation and participation in democratic processes as the key concepts of the PhD project
- Applicants must be available full-time to start the program in September 2025.

### ***Desirable:***

- Prior experience in natural language processing or machine learning or programming
- Prior experience in academic writing or scientific publications

- Prior practical or research experience with social innovation and/or the public sector and/or artificial intelligence

**Eligibility Conditions:**

- Applicants do not already hold a doctoral degree.
- Applicants must not have resided or carried out their main activity (work, studies, etc.) in the country of recruitment for more than 12 months in the 36 months immediately before the recruitment date. Compulsory national service, short stays such as holidays, and time spent as part of a procedure for obtaining refugee status under the Geneva Convention are not taken into account.

**Application Deadline:**

Sunday 18th May 2025

**We Offer:**

The MSCA programme offers competitive and attractive working conditions. You will have an employment contract with [Jožef Stefan Institute](#) and enroll into a PhD programme at [Jožef Stefan International Postgraduate School](#). You will benefit from a competitive salary, annual leave, social security coverage. The salary will be composed of:

- A living allowance (3400 euros per month – gross salary) which is adjusted by applying a country correction coefficient to the living allowance of the country in which the researcher is recruited. The country correction coefficients are indicated in [Table 1 of the MSCA Work Programme](#)
- Monthly mobility allowance: 600 euro/month
- Monthly family allowance, if applicable and depending on the family situation: 660 euro/month

For additional information see [EU MSCA website](#). Please be aware that these amounts are subject to taxes and the exact salary will be confirmed upon appointment. The research project should result in a PhD thesis.

**Selection process**

Our selection procedure is open, transparent, merit-based, impartial, and equitable, in line with the Code of Conduct for the Recruitment of Researchers ([link](#)).

The selection procedure will consist of the following steps:

- Eligibility check: The Recruitment Committee will check each application is complete and that applicants fulfil the eligibility criteria described in the previous section.
- Screening: Applications will be reviewed for eligibility and suitability based on the criteria listed for each position.
- Online interviews: The short-listed candidates will be interviewed by a Selection Committee that will include the recruiting Principal Investigators. Selection committees will bring together diverse expertise and competencies and have an adequate gender balance.
- The recruiting institution will notify the selection outcome after the interview.

### **Additional Comments**

For more information about this position, you can contact Prof Mitja Luštrek ([mitja.lustrek@ijs.si](mailto:mitja.lustrek@ijs.si)).

We are hosting two information sessions on Tuesday 29<sup>th</sup> April 2025 for those interested in applying for a PhD fellow position with Data2Action. The session will start with a 15-minute presentation and then there will be a Q&A. We are running two sessions to ensure maximum global reach. Both sessions will be the same so you should only attend one. Sign up here:

Tuesday 29<sup>th</sup> April 2025, 10am UK time – sign up here:
